

Remote Coders Provide Significant Cost Savings

Located in Western Pennsylvania, our client is a large medical facility that opened in 1914. Since then, this non-profit institution has grown to become the county's sole full-service healthcare provider.

The Challenge

Our client had a backlog in their IP coding and didn't have the staff volume to get the backlog under control. They were also looking for a staffing partner that could provide training coverage, as needed.

The Solution

Within 48 hours of receiving the requisition, ComforceHealth was able to source and place three coders. Our coders accessed the client's electronic records from a secured environment

and provided remote assistance immediately. Additionally, our coders also provided ICD-10 training within the organization.

Skill Set

Medical Coders

The Result

ComforceHealth implemented the RightSource Method for full-cycle recruitment, on-boarding, and program management support of coders. Our coders were able to decrease the

client's backlog from \$7 million to \$2 million in the first month itself. This resulted in significant cost savings for the client.
